## **KWC Professional**

### Our portfolio

KWC Professional, as part of the KWC Group, focuses on the intelligent equipment of sanitary rooms in (semi)-public and commercial installations. Our portfolio also includes solutions for specific sanitary rooms in hospitals and care settings, correctional facilities, schools and laboratories as well as solutions for ensuring barrier-free access.

Across the entire KWC Group, we rely on quality and convincing and compelling products. We are dedicated to one goal: to improve your quality of life – with innovative, long-lasting and exquisitely styled solutions for air and water: for all users. Everywhere, every day, every time. KWC products impress with safety, sustainability & hygiene. We design aesthetically appealing and unmistakable products from high-quality materials, such as 100% recyclable stainless steel or proven mineral granite (MIRANIT). Our electronics components help to ensure touch-free safety, hygienic usage and energy efficiency.

The KWC Group is an international premium manufacturer of valves and fittings and comprehensive sanitary solutions. The former brands of the corporate group – KWC, Franke Water Systems, DEKO and DVS – have been trading under the name KWC Group AG since 2022. In six locations in Europe and Asia, high-quality products are manufactured for private homes, (semi-)public settings and healthcare. For over 150 years, the KWC Group has combined tradition and innovation with strong expertise in technology and materials coupled with high design standards. Sustainability, hygiene, safety and stunning appeal are among its defining values. The KWC Group is headquartered in Unterkulm, Switzerland.
